

PREVOYANCE

IT SOLUTIONS PRIVATE LIMITED

COMPANY PROFILE 2026

Connected systems.
Controlled outcomes.

Digital platforms • Risk intelligence • Managed operations

Who we are

An Indian technology products and consulting company, built for institutions that cannot afford downtime.

THE FIRM

Prevoyance IT Solutions Private Limited is an Indian technology products and consulting company focused on banking, financial services and regulated enterprises. We combine configurable platforms, integration capability and managed operations, so a client moves from business requirement to governed production service through one accountable partner.

Incorporated in January 2022 and headquartered in Nagpur, the firm holds ISO 9001, ISO/IEC 27001, ISO/IEC 20000-1 and ISO 56000 certifications alongside CMMI Maturity Level 3 and DPIIT recognition. Offices in Nagpur and Mumbai anchor delivery, client facing presence spans Pune, Hyderabad and Delhi, and Patna and Kolkata serve as eastern operational centres. Trusted channel partnerships with Google, IBM, Salesforce, Deloitte and Protean back the 160+ member delivery organisation.

DELIVERY CORRIDOR

CREDENTIALS AT A GLANCE

ISO 9001 / 27001 / 20000-1 / 56000

Quality, security, service and innovation management.

CMMI Maturity Level 3

Defined, measured delivery processes.

DPIIT recognised

Startup recognition, DIPP273559.

Who we work with

Markets and named relationships, stitched to the offerings they draw on.

MARKETS

Banking & financial services

Banks, cooperative banks, NBFCs, MFIs and payment institutions: the full stack, from journeys to risk platforms to managed run.

Government & PSU

eGovernance and digital public infrastructure programmes, built on the same integration and identity rails.

Enterprise

Healthcare, education and manufacturing: ERP, CRM, ITAM and managed IT services.

CLIENTS

TRUSTED CHANNEL PARTNERS

NAMED RELATIONSHIPS

ORGANISATION	CONTEXT	WHERE OUR OFFERINGS CONNECT
ICICI Bank	Private sector banking relationship listed in the source profile.	Banking value chain: journeys, cards, risk, operations.
Protean eGov	Digital public infrastructure and RISE partnership.	Protean eGov's technology partner; authorised RISE channel, 100+ APIs.
CERSAI	Central registry context.	Registry grade integration and compliance rails.
Satin FinServ	NBFC and MFI context.	Lending Core, journeys and early warning.
Bajaj Auto	Manufacturing context.	ERP, CRM, ITAM and managed IT services.
Deloitte & Wipro	Consulting and BFSI alliance context.	Delivery partner behind larger transformation programmes.

Relationship names are reproduced from supplied profiles. No scope, commercial value, deployment status or business outcome is inferred where the source did not provide it.

Current engagements

Five relationships, one pattern: a governed API core and outcomes a client can measure.

IN PRODUCTION TODAY

ICICI Bank API PARTNERSHIP

Five plus years running the bank's API estate across Apigee Edge and X, NGINX and Kubernetes, with a 90+ expert team and 5650 delivered work items.

5000+ APIS IN PRODUCTION

Protean eGov DEVELOPER PLATFORM

Apigee X API management with a self service developer portal and automated onboarding. Prevoyance is Protean eGov's technology partner.

40% FASTER ONBOARDING

CERSAI CKYC AND BUDS PLATFORMS

Governed APIs on Apigee, Temporal workflow orchestration and analytics across two registry grade platforms for India's central registry.

60% LESS MANUAL WORK

AgriStack DIGITAL ECOSYSTEM

Population scale digital architecture for Indian agriculture with the Central Government: unified platform, automated data pipelines.

BUILT TO SCALE

Bajaj API PLATFORM

MuleSoft API lifecycle management with a self service developer portal, integrated analytics and a production grade Kubernetes run.

40% FASTER ONBOARDING

THE PATTERN

Governed API core

Apigee or MuleSoft at the centre of every estate.

Automated workflows

Onboarding, orchestration and reporting, hands free.

Measured outcomes

Results the client counts, not claims we make.

Products & services

The portfolio, mapped to how a bank acquires, transacts, lends, protects, complies and operates.

SIX LINES

/ 01 • ACQUIRE

Digital journeys

Composable onboarding, verification and execution: KYC, documents, eSign, eStamp and risk controls for retail, MSME and institutional customers.

/ 02 • TRANSACT

Cards & payments

Transaction risk, chargebacks, merchant and wallet operations across card, ATM, wallet and PPI ecosystems, with managed rule tuning.

/ 03 • LEND

Lending Core LMS

A complete lending system: origination, underwriting rails, credit decisioning, servicing, collections and early warning.

/ 04 • PROTECT & COMPLY

Prevo Fraud & Prevo AML

Our own risk platforms on one decisioning core: real time fraud detection and India focused AML through FIU-IND reporting.

/ 05 • OPERATE

ERP & CRM

Implementation, customisation, integration, migration and managed run for the platforms behind customer and service operations.

/ 06 • VERIFY

Prevo API Stack

100+ identity, verification, onboarding and underwriting APIs across twelve rails, behind one governed window.

EVERY LINE, SAME DISCIPLINE

Build

Configure proven platforms to the client's context.

Integrate

Connect them to the estate under governed contracts.

Run

Operate them 24x7 under SLA, and keep improving them.

Deployment: on premise, private cloud, public cloud or hybrid, aligned to client policy.

Prevo Fraud & Prevo AML

Two risk platforms on one decisioning core. Financial crime rarely respects departmental boundaries; neither do we.

THE PLATFORM

Prevo Fraud and Prevo AML are Prevoyance's own risk platforms, built and evolved in house on one decisioning core. The core watches payments, identity and device signals in real time, decides with rules and machine learning together, and turns every decision into an investigable, explainable case.

Coverage spans UPI, NEFT, RTGS, IMPS, NACH, card, ATM and SWIFT, ingested through API, Kafka or batch. Deployment follows client policy: on premise, private cloud, public cloud or hybrid. Platform claims are validated during technical due diligence.

Sub 100 ms target

Decisioning designed for payment path latency budgets.

No code rule studio

Rules authored and changed in minutes by the bank's own team.

Explainable AI

Feature level SHAP decomposition, human governed outcomes.

360 degree entity view

Customers, accounts, devices, IPs and cases in one graph.

ONE CORE, TWO PLATFORMS

Prevo Fraud

Detect, decide, connect, act across six fraud domains.

Prevo AML

Know, monitor, screen, investigate, report to FIU-IND.

Shared services

Case management, rule studio, entity graph, audit evidence.

Prevo API Stack

100+ verification, onboarding and underwriting APIs behind one governed window.

The Prevo API Stack packages India's digital public infrastructure, from Aadhaar and DigiLocker to NPCI, EPFO and MCA rails, into 100+ production grade APIs with pre-assembled journeys: one contract, one portal, one integration layer and one accountable team.

TWELVE RAILS

/ 01 • ESIGN & STAMP

eSignPro workflow

End to end eSign and eStamp with role based access, audit logs and ready flows.

/ 03 • KYC • BUSINESS

Commercial & MSME

MCA master data, CIN, signatories, IEC, TAN, TIN and Udyam checks.

/ 05 • DIGILOCKER

Consent based documents

Issued and uploaded documents, e-Aadhaar fetch, certificate parsing.

/ 07 • BANK STATEMENT

Statement Analyzer

Single or multi account profiling: income, expenses, balances, anomalies.

/ 09 • ASSET VERIFICATION

Vehicle, FASTag, property

RC checks, FASTag with last location, property tax records.

/ 11 • FRAUD & COMPLIANCE

Risk screening

Email checks, negative due diligence, IP quality: ASN, ISP, geo, threat.

/ 02 • KYC • INDIVIDUAL

Individual identity

Driving licence, Voter ID, Passport, Ration Card; OVD OCR for PAN and Aadhaar.

/ 04 • KYC • PROFESSION

Regulated professionals

ICAI, ICSI and ICWAI membership and certificate of practice checks.

/ 06 • UTILITY & MOBILE

Proof of address

Mobile checks plus electricity, LPG and PNG records.

/ 08 • ACCOUNT VERIFICATION

Payee & account

Pennydrop and pennyless, dynamic and hybrid accounts, IFSC, MNRL.

/ 10 • EMPLOYMENT & INCOME

EPFO, ITR & bureau

UAN validation, establishment search, three year ITR fetch, Experian.

/ 12 • TECH & VALUE ADD

Extraction, matching, geo

Face liveness and match, cheque OCR, forgery checks, geo fencing.

ONE WINDOW

One contract

The whole catalogue behind a single agreement.

One portal

Selection, bundling, billing and support in one place.

Production grade

SLAs, fallbacks and ISO 27001 delivery.

How we engineer & run

Four layers of architecture, six disciplines that apply to every one of them.

INTEGRATION LED ARCHITECTURE

EXPERIENCE Customer and operations journeys, dashboards, workspaces

DECISION Rules, scores, approvals, case orchestration

INTEGRATION API, events, batch, mapping, policy enforcement

SYSTEMS & DATA Core banking, payments, repositories, approved partners

ENGINEERING DISCIPLINES

Security by design

Least privilege, encryption, secrets management, audit logging, secure gates.

Operational visibility

Health, latency, throughput, errors and business event telemetry.

Resilience

Retry, idempotency, fallback, backup and recovery patterns by criticality.

Data governance

Purpose limitation, lineage, access review, masking, retention controls.

Change governance

Versioning, testing, approvals, release evidence, rollback readiness.

Deployment choice

On premise, private cloud, public cloud or hybrid, per client approval.
